danielbobbriggs Feb 11, 2:19 AM

danielbobbriggs please send custom offer for initial cost, then we will proceed to next step when we get there. Also please share email i can send access to.

Me Feb 11, 2:23 AM

The updated content means that if you want to change any content or add more content to the site. If you provide them, that's absolutely fine.

Before proceeding, I want to just clarify one thing: I made a silly mistake on the quotation. Since we are using Wix, the site will be responsive for Mobile and Desktop.

But I mistakenly mentioned all devices (desktop, tablet, and mobile). I want to be transparent before moving forward.

I am placing the custom offer for the initial setup.

danielbobbriggs Feb 11, 2:24 AM

sounds good

Me Feb 11, 2:24 AM

Here's your custom offer

I will design or redesign wix website, develop wix landing page, wix studio website \$1,000

Initial Website development/Enhancement: (Phase 1)

danielbobbriggs Feb 11, 2:24 AM

Me Here we go. Please accept the offer to get started.

Thank you

danielbobbriggs Feb 11, 2:25 AM

share email so i can grant access.

danielbobbriggs Feb 11, 2:26 AM

we should schedule a call on Thursday Texas time. I am available anytime between 11AM and 4PM.

Me Feb 11, 2:26 AM

Please go through this doc:
https://docs.google.com/document/d/149cNqJ9Nd_rzVIRuLAC7enRuwWGiPvTBvZe5nBu/edit?usp=sharing

danielbobbriggs Feb 11, 2:27 AM

invite sent. let's connect on Thursday as well. You can gather more information and we can plan out next pages and upgrades.

Me Feb 11, 2:27 AM

Okay, got the login.

danielbobbriggs Feb 11, 2:28 AM

Hello there,

Hope you and your family are safe and sound.

I would like to clarify a few details regarding the Wix website redesign. Could you please confirm whether you would like to redesign the entire website or only specific pages? If only certain pages need to be updated, kindly let me know which ones.

Additionally, if you have any reference websites or specific design styles in mind, please feel free to share them. This will help me better understand your expectations and ensure the redesign aligns with your vision.

Once the design phase is fully completed and approved, I will proceed with the SEO optimization.

I look forward to your clarification so I can begin the work accordingly.

Thanks.

danielbobbriggs Feb 12, 5:55 AM

Let's start on improving existing website pages before we proceed adding new.

danielbobbriggs Feb 12, 6:01 AM

<https://www.wmcpharmacy.com/>
- this is our main page, it has nice animation, couple icons. I don't want to change anything but would like to add something more, for example I would like to add google review widget, that will help us gain more trust. I also would like to know your feedback when it comes to adding more to get more traffic.

Me Feb 12, 6:04 AM

Sounds good! Let me work on this and update you.

And I will keep all the existing content and animation. But in terms of design, do you want to keep the existing structure or change it? I can make the structure better for you.

Edited

danielbobbriggs Feb 12, 6:05 AM

<https://www.wmcpharmacy.com/providers>
- this page is for doctors, the b2b section. Right now it needs a lot of work because we only have link to the back end. This section is perfect for us to put more SEO tailored for b2b. Our key b2b partners are doctors. I am sharing some information that can help you create material for it here:

danielbobbriggs Feb 12, 6:06 AM

We upgraded our pharmacy infrastructure to a modern, all-in-one workflow platform built specifically for compounding and telehealth operations. Pharmetika is a pharmacy workflow and management platform used by compounding and telehealth pharmacies to handle prescriptions, patient records, provider orders, and fulfillment in one system. It helps automate intake, compliance, labeling, inventory, and shipping so clinics and digital health companies can scale operations efficiently.

No more writing scripts or sending emails/faxes
Providers and refill teams can submit prescriptions digitally in seconds.
Dedicated clinical portal
Each organization gets secure login access to:
Submit new prescriptions
View prescription status in real time
Track fulfillment and shipping
Manage refills effortlessly
Patient access included
Patient access included
Check order status
View tracking information
Reduce "where is my medication?" calls
Fewer interruptions for staff
Dramatically cuts phone calls, back-and-forth emails, and manual follow-ups.
Built for B2B healthcare workflows
Designed to support high-volume clinics, telehealth providers, and compounding pharmacies.

You can spin it like this: Real-time prescription tracking. Digital scripts. Fewer phone calls. One pharmacy portal for your entire clinic and your patients."

Staff overwhelmed by status calls (major pain)
Front desks and refill teams lose hours daily answering "Is my medication ready?"
Slow prescription process (major pain)
Faxing, emailing, and manual scripts delay treatment and frustrate everyone involved.
Refill teams stuck as middlemen (major pain)
They spend more time relaying messages than helping patients.
Doctors buried in admin work (major pain)
Providing clear patient care to paperwork and coordination.
No visibility after sending a script (major pain)
Clinics are left guessing once prescriptions leave their system.
Patients get anxious and overcall
Lack of updates leads to repeated calls and complaints.
Too many disconnected tools
Emails, spreadsheets, and portals create mistakes and lost information.
Operations break when volume grows.
More patients usually means more chaos, not more efficiency.
Pharmacy delays hurt clinic reputation.
Patients blame the provider even when the issue is fulfillment.

danielbobbriggs Feb 12, 6:07 AM

Replied

Me Feb 12, 6:04 AM

Sounds good! Let me work on this and update you. And I will keep all the existing content as.

I would love to see you improve the structure, my only recommendation, please keep a back up copy just in case.

danielbobbriggs Feb 12, 6:10 AM

sharing material for patient page:
A Smarter, Simpler Pharmacy Experience

We upgraded our pharmacy infrastructure to a modern, all-in-one digital platform designed to make medication management easier, faster, and more transparent for patients.

Our system streamlines prescriptions, refills, order tracking, and fulfillment into one secure portal – eliminating uncertainty and reducing delays.

Real-Time Prescription Visibility

No more guessing. No more unnecessary calls.

Patients can securely access their pharmacy portal to:

- Check prescription status anytime
- View fulfillment progress in real time
- Track shipments instantly
- Access medication updates
- Manage refills with ease

Full transparency, from prescription to delivery.

Designed Around Patient Convenience

Modern healthcare should feel effortless.

Our digital workflow allows patients to:

- Avoid repeated "status check" phone calls
- Receive immediate updates on orders
- Track shipments without contacting staff
- Manage medications from any device

Clear information. Less frustration. Better experience.

Fewer Delays. Less Confusion. More Control.

Traditional pharmacy processes often create stress:

- Unclear prescription timelines
- Limited visibility after a script is sent
- Repeated calls for updates
- Delays caused by manual workflows

Our platform removes these pain points by providing direct access to real-time prescription data.

Integrated Pharmacy Technology

We utilize a modern pharmacy workflow and management system used by advanced compounding and telehealth pharmacies.

This system helps coordinate:

- Prescription processing
- Compliance & verification
- Labeling & fulfillment
- Inventory & logistics
- Secure patient records

The result is a faster, more predictable pharmacy experience.

A Better Experience for Patients and Clinics

When patients have visibility, everyone benefits:

- Reduced anxiety around medication timelines
- Fewer "Where is my medication?" calls
- Faster refill coordination
- Less back-and-forth communication
- Improved treatment continuity

Efficiency behind the scenes creates a smoother experience for you.

danielbobbriggs Feb 12, 6:11 AM

Secure Patient Access

Your privacy and medical information are always protected.

The portal provides:

- Secure login access
- HIPAA-compliant data handling
- Protected prescription records
- Confidential medication management

Built for safety, security, and peace of mind.

Simple. Transparent. Reliable.

Modern pharmacy care should feel this way:

Real-time prescription tracking.
Clear fulfillment updates.
Seamless refill management.
All in one secure pharmacy portal.

Call to Action (Website-Ready)

Already have a prescription with us?
Log in to your patient portal to check status, track shipments, or manage refills.

New patient?
Complete your intake online to get started.

danielbobbriggs Feb 12, 6:12 AM

I will stop right now, once we take care of those page we can proceed to next. As always reach out if I can assist. Happy to help so don't hesitate to reach out as many times if that can help.

Me Feb 12, 6:14 AM

You are a very helpful man, thanks a bunch!

danielbobbriggs Feb 12, 6:15 AM

Hello there,
It's a first-draft update!
Hope you and your family are safe and sound!

As per your order requirements, I've completed the following tasks:

- I've redesigned the website based on your requirements.
- I've designed 3 main pages
- I've used your provided text content for the website
- I've taken the color font from your previous website.
- I've used placeholder images for now.
- I've used your logo.
- I've designed the website for both desktop and mobile user-friendly.

Please have a look at:
<https://www.wmcpharmacy.com/home-new>
<https://www.wmcpharmacy.com/providers-new>
<https://www.wmcpharmacy.com/patients-new>

I've recorded a video of an overview of the website.
Here is the video:
<https://app.userebubbles.com/Cy6MTZihV44dtU7eteW8/recording-feb-14-2026>

This is the first draft of the website. Don't worry about anything, I'll make the necessary changes to your website based on your valuable feedback.

For some reason, if you have any questions, modifications, or concerns, let me know. I'll get back to you as soon as possible.

Best regards.

danielbobbriggs Feb 12, 6:16 AM

For Providers page and Patients page please put the button links like we had before for Pharmetika ASAP Patients can't log in now without link!

danielbobbriggs Feb 12, 6:17 AM

Also patients page have pharmacy logo in the middle which is wrong.

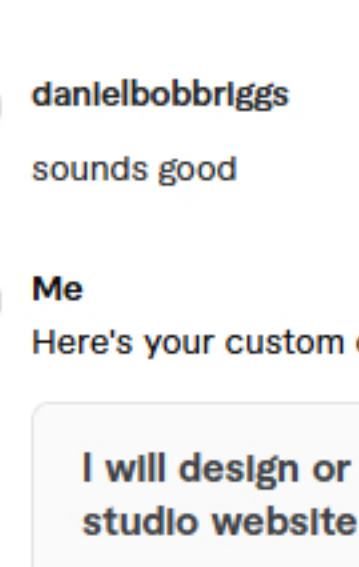

danielbobbriggs Feb 12, 6:18 AM

For patients page we need to use information from original website page for new patients to email us to get started, there should not be button "get started". Instead we can have Pharmetika log in button on top, remove learn more button.

danielbobbriggs Feb 12, 6:19 AM

Also you did not talk much about Pharmetika on Provider page, some doctors know this system and it should help them understand that it would be easy to partner with us.

danielbobbriggs Feb 12, 6:20 AM

also this part we need to fix,

Screenshot... (1.81 MB)

Me Feb 12, 6:24 AM

I sincerely apologize for the inconvenience.

It's late over here. I will make all the changes you have mentioned and update you asap. Thank you for your patience!

danielbobbriggs Feb 12, 6:25 AM

Hello there,
Hope you and your family are safe and sound.

As per your message request, I've completed the following task:

- I've added a provider's portal button on the provider page.
- I've added a patient portal button to the patient page.
- I've removed the logo on the patient page.

Please have a look at:
<https://www.wmcpharmacy.com/providers-new>
<https://www.wmcpharmacy.com/patients-new>
<https://www.wmcpharmacy.com/home-new>

Note: If you have any fixes or modifications, please send them to me through the Fiverr inbox. I'll take care of them for you.

For some reason, if you have any questions, modifications, or concerns, let me know. I'll get back to you as soon as possible.

Best regards.
